AceSeal EZ-Shot HVAC/R LEAK SEALER

Treats Up To 6 Ton Unit
Permanently Seals Leaks in A/C and Refrigeration Systems
Additives Protect Against Future Corrosion

Very Effective for Preventative Maintenance
Does Not React to Air or Moisture
Compatible With All Lubricants and Refrigerants
Safe for All A/C Systems, Components and Equipment
Reduces Compressor Noise and Extends Compressor Life
Reuseable Hose

ACESEAL EZ SHOT (ASEZ) is formulated to repair microscopic leaks 30 mm and smaller. One 2oz syringe will treat up to 6 ton unit. Compatible with all oils and refrigerants.

DIRECTIONS:
1. Switch unit off
2. Unscrew the protective cap from the syringe. Connect syringe to the hose. (See Figures A-B)
3. Next, attach a bleed valve/Schrader service valve to the syringe/hose and press the plunger to remove any air in the syringe/hose. Alternatively, after connecting the hose/syringe depress the stop valve in the hose end with a screw driver and press the plunger on the syringe to remove any air in the hose.
4. Attach hose end to low pressure port and tighten sufficiently to ensure flow valve in hose end is fully engaged.
5. Switch on unit and then quickly introduce sealant into system when system pressures are at their lowest point.

TECHNICAL TIPS:
• If using a caulking gun it is important to center the syringe in the cradle of the caulking gun and to center the plunger of the syringe in the center of the caulking gun's plunger. Always keep one hand resting on top of the syringe to ensure the syringe remains centered during the application process.
• It may be necessary to remove some of the sealant in syringe to allow proper caulk gun fit.
• If above directions do not work, put system into a shallow vacuum to facilitate easy application.
• Some sealant will remain in the hose after use. The syringe is deliberately over-filled to ensure a full 2oz dose is achieved.

WARNING: Keep out of reach of children, avoid contact with skin. Always use protective eyewear. In case of eye contact flush with water for 15 minutes.

DISPOSAL: Please dispose in accordance with all local, state & federal regulations.
