NOVENT®

LOCKING A/C REFRIGERANT CAPS

Protect children from the dangers of inhalation. And protect your A/C refrigerant levels to maintain peak effectiveness and efficiency of the unit.

[Be Proactive not Reactive]

Ask your A/C service provider today.

Novent locking Caps

Require special tools to apply and remove the caps, making it difficult for non-professionals to access the refrigerant.

- ✓ Protects your children
- ✓ Protects your home from theft of refrigerant
- ✓ Protects you from liability

Novent is code compliant

Is Your A/C Protected?

Signs of Refrigerant Theft

- Refrigerant low & leak cannot be found
- Service Caps are missing
- Kitchen knife or similar near the unit
- Plastic bag(s) near unit

Insist on code compliant caps. *

Effective February 2009 the International Mechanical Code and International Residential Code requires that all outdoor access ports on A/C Refrigerant circuits be fitted with locking-type tamper resistant caps. Novent locking A/C refrigerant caps are the proven code compliant solution.

*The 2009 and 2012 Code Commentary refers to "special tool or key" as how to comply with code.
